

Data Engineer

WN Talents

Job Overview

Location: Remote work
Website: <https://talentsingames.com/>

Description

Our client — **a leading mobile game developer and publisher** — is looking for a **Data Engineer** to join BI Infrastructure team.

Responsibilities:

- Design reliable data pipelines
- Unify data from various sources, including in-game activity events and aggregated partner data
- Develop optimal data models for game and marketing analytics
- Handle data enrichment, transformation, and validation
- Take responsibility for data quality

Requirements:

- 3+ years of experience as a Data Engineer
- Understanding of mobile app metrics
- Strong skills in writing and optimizing complex SQL queries
- Hands-on experience with ETL/ELT systems
- Experience building data loaders
- Strong analytical skills and a data-driven mindset

Will be a plus:

- Experience with Google BigQuery, Looker Studio, or Apache Superset
- Familiarity with MMP platforms such as AppsFlyer, Adjust, etc.
- Experience working with ClickHouse

- Knowledge of Golang or Python
- Experience with tools like dbt or Cube

Company offers:

- Opportunity to work for a US company with a diverse portfolio of global free-to-play (F2P) projects with a multi-million monthly user base
- Involvement in the entire product development cycle
- Career growth prospects within an international company
- Remote work opportunities
- Flexible working schedule
- Bonuses based on the achievement of KPIs and financial results of projects
- Paid conferences, training (including language courses), and workshops
- Opportunity to have sessions with psychologists to improve your mental health and well-being
- Participation in charity projects
