Job Overview

Location:	Remote work
Tagged as:	Android SDK
Website:	https://talentsingames.com/

Description

We are looking for an experienced Fullstack Engineer skilled in Flutter environment for our client, a Cyprus-based company who is a growing developer of mobile games and apps, dedicated to creating high-quality digital experiences across various platforms. With a focus on innovation and collaboration, we are looking to expand the team and bring on a skilled Senior Flutter Developer to contribute to our exciting projects.

Key Responsibilities

- Develop custom Flutter packages leveraging existing Android and iOS APIs.

- Manage back-end servers written in Node.js.

- Translate designs and wireframes into high-quality, responsive UI code.

- Connect applications to back-end services using RESTful APIs.

- Utilize version control tools such as Git and Jenkins.

- Write clean, readable code and provide detailed documentation.

- Conduct automated testing to ensure reliability and performance.

Key Requirements

- Bachelor's Degree in Computer Science, Software Engineering, or a related field.

- 3-4 years of mobile development experience (iOS/Android), with a strong focus on Flutter and Dart.

- Proficient in Dart and familiar with Java, Node.JS

- Experience with agile methodologies and SQ Lite.

- Knowledge of mobile app development for both iOS and Android, and UX design is a plus.

- Strong problem-solving skills and attention to detail.

- Self-motivated, capable of independent work without extensive oversight.

How team works:

- Full remote or onsite in Cypruss

- Team Interaction: Daily communications on Slack, task management in Jira, documentation on Confluence, and reporting through Telegram.

- Development Frameworks: Kanban or Scrum, as per project needs.
Project Stack & Tools: Front-end with Flutter; back-end with Node.js or Firebase Functions, depending on the project.
