Описание

Are you a talented **Unity Developer** looking for your next adventure in game development? Our client is expanding, and we're searching for passionate individuals to join the growing team!

About the company:

They are a 10-year-old game development company with a strong portfolio of 5 launched titles. They are currently focusing on one of successful games, but they have exciting plans for new projects on the horizon.

The company is based in Cyprus. They're a tight-knit group, eager to grow the team and expand the game portfolio!

Your Role

We're looking for two skilled Unity Developers to join. You'll primarily be working on designing and building our brand-new games, with the potential to contribute to the maintenance of existing projects based on your skills and preferences.

What We're Looking For

Experience: You should have at least 2 years of professional experience with Unity and C#. We're seeking clever, proactive individuals who are ready to make an impact.

Technical Skills: While we don't have strict requirements for specific knowledge like ECS, DOTS, Zenject, REST API, Addressables, or UniRx, a solid understanding of these technologies will be a significant plus and could influence your compensation. The more you know, the better!

Adaptability: Ability to adapt to new projects and potentially contribute to existing ones.

Benefits:

25 days of annual leave

Gym subscriptions and private health insurance

Strong career perspectives

On-site job in Limassol: relocation support for the candidate

Our Hiring Process

Agency Interview: An initial screening with our recruitment partner.

Company Interview: A focused interview with our CTO and the relevant Team Lead.

Technical Test: A practical test to showcase your skills.

Offer: A final offer to the successful candidate.
